PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building and deploying production-grade web applications. Sole developer of a live HR & Payroll Portal at Launcher Labs; architected a microservices-based cricket scoring system with Kafka event streaming; and independently resolved real-world backend deployment challenges. Seeking an SDE role to contribute value from day one.

TECHNICAL SKILLS

Languages	Java, JavaScript
Frontend	React.js, HTML5, CSS3, Tailwind CSS
Backend	Spring Boot, REST APIs, Microservices, Apache Kafka, Eureka, API Gateway
Databases	MySQL, Room Database (Android)
Tools & Platforms	Git, GitHub, Postman, Railway, cPanel, Docker (Basic),Render
Android	Java, XML, Android SDK

WORK EXPERIENCE

Launcher Labs: Full Stack Developer

Jan 2026 – Apr 2026

HR & Payroll Portal — Live Production Deployment

- Sole developer responsible for designing, building, and deploying a full-featured HR portal used by company employees and admins.
- Built core features including pay slip generation, Form 16 management, and secure document upload/download.
- Resolved a backend deployment constraint — hosted Spring Boot backend on Railway, connected to React frontend on cPanel.
- Application went live and was actively used by the organization.
- **Stack: React.js ,Spring Boot , MySQL , REST APIs ,Railway , cPanel**

PROJECTS:

Cricket Scoring System — Microservices + Kafka

2025

Spring Boot · Apache Kafka · Eureka · API Gateway · MySQL · React.js · Tailwind CSS

- Architected a microservices-based live scoring system with 5 services: Team, Match, Scoring, Stats, and Notification.
- Implemented event-driven communication via Apache Kafka for real-time ball-by-ball events pushed to the React frontend.
- Used Eureka Service Discovery and API Gateway for dynamic service routing across all microservices.

GOC Scoring — Game of Thrones Gully Cricket App (Android)

Java · Android SDK · XML · Room Database

• Developed a Game of Thrones-themed Android gully cricket scoring application with an intuitive UI using Java and XML.
• Implemented offline-first functionality using Room Database to store match data, player stats, and scoring history with seamless data persistence.
• Designed real-time scoring features including ball-by-ball updates, automated score calculations, and match summaries, ensuring a smooth user experience without internet dependency.

EDUCATION

B. Tech — Electronics & Communication Engineering *2021 – 2024*

Vignan Institute of Technology and Science, Hyderabad, Telangana
